INTRODUCTION

The Virginia Department of Conservation and Recreation's Division of Natural Heritage (DCR-DNH) was established to protect Virginia's Natural Heritage Resources. These Resources are defined in the Virginia Natural Area Preserves Act of 1989 (Section 10.1-209 through 217, *Code of Virginia*), as the habitat of rare, threatened, and endangered plant and animal species; exemplary natural communities, habitats, and ecosystems; and other natural features of the Commonwealth. DCR-DNH is the state's only comprehensive program for conservation of our natural heritage and includes an intensive statewide biological inventory, field surveys, electronic and manual database management, environmental review capabilities, and natural area protection and stewardship. Through such a comprehensive operation, the Division identifies Natural Heritage Resources which are in need of conservation attention while creating an efficient means of evaluating the impacts of economic growth.

To achieve this protection, DCR-DNH maintains lists of the most significant elements of our natural diversity. These lists focus the Division's inventory on the Natural Heritage Resources most likely to be lost without conservation action in the near future. Most importantly, these lists are not only useful for DCR-DNH, but can be used by other agencies, organizations, and individuals to guide protection and development decision-making. In formulating these lists, the Division uses information from previous studies, museum records, the observations and opinions of experts, DCR-DNH staff scientists, and field inventories.

The first list included in this report is the Rare Vascular Plant List. This list contains information on the legal and biological status of Virginia's rarest known native vascular plant taxa, **609** in all. This list includes all plants believed to be sufficiently rare or threatened to merit an inventory of their status and locations.

The second list included in this report is the Vascular Plant Watchlist. This list contains information on the legal and biological status of **229** additional taxa that are decidedly uncommon in Virginia but not scarce enough to merit inclusion on the Rare Vascular Plant List. Plants on this list are monitored to determine general population trends. If a species or variety on this list is found to be rare or threatened, it is placed on the Rare Vascular Plant List. Taxa of uncertain status, which formerly made up a large percentage of the Watchlist, may now be found on the Review List (see below).

The third list included in this report is the Review List (Taxa of Uncertain Status). These taxa lack numerical ranks, indicating that they are poorly known from a taxonomic and distributional standpoint. Although some of these taxa may prove to be conservation targets, more field and herbarium data are needed to assess their distinctiveness and degree of rarity in Virginia. There are **149** taxa in this category.

The fourth list included in this report is the Rare Non-Vascular Plant List. This list contains information on the legal and biological status of **44** taxa thought to be rare in the state of Virginia. The lichens, liverworts, and mosses listed herein represent an attempt at designating imperiled species within this often-neglected group. The list is currently small compared to the vascular plant lists because the taxonomy and distributions of non-vascular plants are generally poorly known in Virginia at this time (with some exceptions). A large percentage of the listed species are mosses of the genus *Sphagnum*. These taxa are listed due to the field and herbarium work of Christopher A. Clampitt and Lewis E. Anderson, who resolved many of the taxonomic and distributional questions pertaining to *Sphagnum* in Virginia. Additional listings of non-vascular plants in future years are expected as our knowledge of this portion of the flora increases. Ecologists with the Division of Natural Heritage have been instrumental in urging this listing of imperiled taxa and have helped to revise the list based on new information. The lichen list has been revised in particular this year, based mostly on field work in Shenandoah National Park and subsequent identifications made by lichen experts at the New York Botanical Garden and by lichen expert Don Flenniken of West Virginia.

Natural Heritage Resource lists are necessarily dynamic and are revised annually, with updates occurring as data become available. Such revisions assure the most current knowledge of the status of Virginia's plants. Taxa are added to the list when it is determined that they have become rare or threatened to such an extent that their continued existence in Virginia is in jeopardy. Plants are deleted from the list when data indicate they are common and do not warrant priority conservation efforts.

If you have information which could refine this list, please contact DCR-DNH staff botanist John Townsend at (804) 225-4855 (email: john.townsend@dcr.virginia.gov) or by mailing the Rare Species Sighting Form found at the end of this document.

All plants which are officially protected by federal or state endangered species acts are included in these lists. The Office of Plant Protection within the Virginia Department of Agriculture and Consumer Services (VDACS) has regulatory responsibility for the listing and protection of Virginia's endangered and threatened plants and insects under the Virginia Endangered Plant and Insect Species Act, as amended (Section 3.1-1020 through 1030, *Code of Virginia*). The Act provides for the official listing and recovery of endangered and threatened plant and insect species in Virginia. The Act also establishes a permit system for collection of listed species. As of March 2005, there were 26 state-listed plant species. A memorandum of agreement between DCR-DNH and VDACS facilitates data transfer between agencies and allows for DCR-DNH to nominate species for listing by VDACS.

Federally listed species are protected by the Endangered Species Act of 1973, as amended. The U.S. Department of the Interior's Fish and Wildlife Service administers the Act, listing and protecting federally endangered and threatened species. As of March 2005, there were 16 plant species federally listed as endangered or threatened which occur or formerly occurred in Virginia.

The Virginia Department of Conservation and Recreation, Virginia Department of Agriculture and Consumer Services, and U. S. Fish and Wildlife Service work cooperatively to insure the continued survival of Virginia's diverse flora and other elements of natural diversity. The Division of Natural Heritage also works closely with other state and federal agencies, local governments, conservation organizations, and other organizations and individuals to seek adequate protection of Virginia's natural heritage.

LIST FORMAT

The rare plant list and the watchlist are ordered alphabetically by scientific name. Each list has an identical format which presents six fields: scientific name, common name, global rank, state rank, federal status, and state status. To aid in the interpretation of the list, a brief explanation of each field follows:

Column 1. Scientific name:

In most cases, nomenclature for vascular plants follows Kartesz, J.T. 1999. *A Synonymized Checklist and Atlas with Biological Attributes for the Vascular Flora of the United States, Canada, and Greenland*. First Edition. In: Kartesz, J.T., and C.A. Meacham. *Synthesis of the North American Flora, Version 1.0*. North Carolina Botanical Garden, Chapel Hill, NC. or A.S. Weakley *Flora of the Carolinas and Virginia* (In prep.). Since the user may not have access to these references, a line is provided below the scientific name to provide a synonymy when other names are used in popular botanical references. These references include the 3rd edition of the *Atlas of the Virginia Flora* by A.M. Harvill, Jr., T.R. Bradley, C.E. Stevens, T.F. Wieboldt, D.M.E. Ware, D.W. Ogle, G.W. Ramsey, and G.P. Fleming (1992), A.E Radford, H.E. Ahles, and C.R. Bell's *Manual of the Vascular Flora of the Carolinas* (1968), and M.L. Fernald's *Gray's Manual of Botany*, 8th edition (1950). The synonymy field is also used to give other pertinent taxonomic information and note when the nomenclature does not follow Kartesz. In addition to the synonymy line, a genus cross-reference is provided so that taxa treated in various genera by different authors can be easily located.

Nomenclature for lichens follows Esslinger, T.L. 1997. A cumulative checklist for the lichen-forming, lichenicolous, and allied fungi of the continental United States and Canada. North Dakota State University: <http://www.ndsu.nodak.edu/instruct/esslinge/chcklst/chcklst7.htm> (First Posted 1 December 1997, Most Recent Update 27 August 2001), Fargo, North Dakota.

Nomenclature for liverworts follows Hicks, Marie L. 1992. Guide to the Liverworts of North Carolina. Duke University Press, Durham, N.C. 239 pp.

Nomenclature for mosses follows the Bryophyte Names Authority List published online by the Missouri Botanical Garden at:
<http://www.mobot.org/MOBOT/tropicos/most/bryolist.shtml>

Column 2. Common name:

A common name is provided for the convenience of the user. Common names for plants are not standardized and many taxa have no entirely satisfactory common name.

Column 3. Global rank:

Global ranks are assigned by a consensus of the network of natural heritage programs, scientific experts, and The Nature Conservancy to designate a rarity rank based on the range-wide status of a species or variety. This system was developed by The Nature Conservancy and is widely used by other agencies and organizations as the best available scientific and objective assessment of a taxon's rarity and level of threat to its existence. The ranks are assigned after considering a suite of factors, including number of occurrences, number of individuals, and severity of threats.

G1 = Critically Imperiled - At very high risk of extinction due to extreme rarity (often 5 or fewer populations), very steep declines, or other factors.

G2 = Imperiled - At high risk of extinction due to very restricted range, very few populations (often 20 or fewer), steep declines, or other factors.

G3 = Vulnerable - At moderate risk of extinction due to a restricted range, relatively few populations (often 80 or fewer), recent and widespread declines, or other factors.

G4 = Apparently Secure - Uncommon but not rare; some cause for long-term concern due to declines or other factors.

G5 = Secure - Common, widespread and abundant.

GH = Possibly Extinct - Missing; known from only historical occurrences but still some hope of rediscovery.

GX = Presumed Extinct - Not located despite intensive searches and virtually no likelihood of rediscovery.

GU = Unrankable - Currently unrankable due to lack of information or due to substantially conflicting information about status or trends. Whenever possible, the most likely rank is assigned and the question mark qualifier is added (e.g., G2?) to express uncertainty, or a range rank (e.g., G2G3) is used to delineate the range of uncertainty.

G_? = Inexact Numeric Rank - Denotes inexact numeric rank (e.g., G3?).

G_Q = Questionable taxonomy - Taxonomic distinctiveness of this entity at the current level is questionable; resolution of this uncertainty may result in change from a species to a subspecies or hybrid, or the inclusion of this taxon in another taxon, with the resulting taxon having a lower conservation priority (e.g., G3Q).

G_T_ = Infraspecific Taxa - Signifies the rank of a subspecies or variety. For example, the rank G5T1 would be assigned to a very rare and localized variety of an otherwise widespread and common taxon.

GNR = Unranked - Global rank not yet assessed.

GNA = Not applicable - A conservation status rank is not applicable because the species is not a suitable target for conservation activities.

Column 4. State rank:

State ranks are assigned in a manner similar to that described for global ranks, but consider only those factors within the political boundaries of Virginia. For example, whereas a plant which is endemic to Virginia (found nowhere else) will have the same global and state ranks, a plant which may be common in the northeastern United States, but only known from a few occurrences in Virginia will have different global and state ranks. By comparing the global and state ranks, the status, rarity, and the urgency of conservation needs can be ascertained.

S1 = Critically Imperiled - At very high risk of extirpation from the state due to extreme rarity (often 5 or fewer populations), very steep declines, or other factors.

S2 = Imperiled - At high risk of extirpation from the state due to very restricted range, very few populations (often 20 or fewer), steep declines, or other factors.

S3 = Vulnerable - At moderate risk of extirpation from the state due to a restricted range, relatively few populations (often 80 or fewer), recent and widespread declines, or other factors.

S4 = Apparently Secure - Uncommon but not rare; some cause for long-term concern due to declines or other factors.

S5 = Secure - Common, widespread and abundant.

SH = Possibly Extirpated - Known only from historical occurrences but still some hope of rediscovery.

SX = Presumed Extirpated - Not located despite intensive searches and virtually no likelihood of rediscovery.

SU = Unrankable - Currently unrankable due to lack of information or due to substantially conflicting information about status or trends.

S_? = Inexact Numeric Rank - Denotes inexact numeric rank (e.g., S3?).

SNR = Unranked - State conservation status not yet assessed.

SNA = Not Applicable - A conservation status rank is not applicable because the species is not a suitable target for conservation activities.

Column 5. Federal Status:

Federal Status is determined by the U. S. Fish and Wildlife Service. This includes all species and varieties which are listed as endangered or threatened by the U. S. government and receive protection under the federal Endangered Species Act. The list also notes those taxa which are proposed for listing or are candidates for listing.

LE = Listed Endangered - A taxon is threatened with extinction throughout all or a significant portion of its range.

LT = Listed Threatened - A taxon is likely to become endangered in the foreseeable future.

PE = Proposed Endangered - A taxon is proposed for listing as endangered.

PT = Proposed Threatened - A taxon is proposed for listing as threatened.

C = Candidate - There is enough available information to propose the taxon for listing, but listing is "precluded by other pending proposals of higher priority". The U.S. Fish and Wildlife Service is "directed to make prompt use of the emergency listing if the well-being of any such species is at significant risk."

_* = An * following the status denotes that the species or variety is possibly extinct.

Column 6. State Status:

State status indicates those plants which are listed as state endangered or threatened under the authority of the Virginia Department of Agriculture and Consumer Services.

LE = Listed Endangered

LT = Listed Threatened

PE = Proposed Endangered

PT = Proposed Threatened

C = Candidate for listing as threatened or endangered

ACKNOWLEDGEMENTS

If not for the hard work of many biologists, these plant lists could not accurately reflect our current understanding of the Virginia flora. On the staff of the Division of Natural Heritage, a dedicated staff of botanists and ecologists, including Allen Belden, Phil Coulling, Gary Fleming, Chris Ludwig, Kathleen McCoy, Shelly Parrish, Gina Pisoni, Nancy Van Alstine, Dean Walton, Karen Patterson, Kristin Taverna, Irvine Wilson, Mike Leahy, and Darren Loomis have provided many comments to refine the content of the lists. Dean Walton's keen interest in and understanding of non-vascular plants and their rarity in the state of Virginia and elsewhere, and has been instrumental in the listing of non-vascular plants herein. In addition to Heritage staff, the work of the Virginia Atlas Committee allows us a much greater understanding of the status of our botanical heritage. Our thanks go out to Alton Harvill, Ted Bradley, Doug Coleman, Gary Fleming, Doug Ogle, Gwynn Ramsey, Donna Ware, Tom Weiboldt, and Robert Wright.

Recent regional floristic work by Alan Weakley has also been of great assistance, particularly regarding recent taxonomic and nomenclatural changes.

Other individuals who have contributed include Rodney Bartgis, Stan Bentley, Jessica Bier, Jay Bolin, George Buchholz, Byron Carmean, Chris Clampitt, Jane Collins, Virginia Crouch, Steve Croy, Allison Cusick, Doug DeBerry, Tom Dierauf, Mike Donahue, Cris Fleming, Cecil Frost, Chris Frye, Mary Geil, Holly Grubbs, P.J. APPENDIX 1: CHANGES TO THE 2006 LISTS

Below is a summary of the changes to the plant lists since the 2006 edition:

NOTE: The contents of the Vascular Plant Watchlist have been divided between the Vascular Plant Watchlist and the Review List. Plants on the Vascular Plant Watchlist are generally ranked S3 or S3?, while those on the Review List lack numerical ranks, indicating they are poorly known from a taxonomic or distributional standpoint. Though some of these taxa may prove to be conservation targets, more field and herbarium data are needed to assess their distinctiveness and degree of rarity in Virginia.

1) Additions to the rare vascular plant list:

<u>Scientific Name</u>	<u>New Rank</u>	<u>Old Rank</u>
<i>Clinopodium arkansanum</i> (Nutt.) House	SH	N/A
<i>Cornus amomum</i> (P. Mill.) ssp. <i>obliqua</i> (Raf.) J.S. Wilson	S2	SNR
<i>Eleocharis wolfii</i> (Gray) Gray ex Britt.	S1	SU
<i>Gratiola ramosa</i> Walt.	S1	SNR
<i>Lindera subcordiacea</i> B. E. Wofford	S2?	SU
<i>Taxodium ascendens</i> Brongn.	S1	SNA
<i>Viola pedatifida</i> G. Don	S1	N/A

2) Additions to the rare non-vascular plant list:

<u>Scientific Name</u>	<u>New Rank</u>	<u>Old Rank</u>
<i>Arctoparmelia centrifuga</i> (L.) Hale	S1	N/A
<i>Buellia stellulata</i> (Taylor) Mudd	S1	N/A
<i>Cladonia coccifera</i> (L.) Willd.	S1?	N/A
<i>Parmelia omphalodes</i> (L.) Ach.	S2?	N/A
<i>Porpidia lowiana</i> Gowan	S1	N/A
<i>Porpidia tuberculosa</i> (Sm.) Hertel & Knoph	S1	N/A
<i>Punctelia graminicola</i> (B. de Lesd.) Egan	S1	N/A
<i>Stereocaulon glaucescens</i> Tuck.	S2?	S2?

3) Additions to the vascular plant watchlist:

<u>Scientific Name</u>	<u>New Rank</u>	<u>Old Rank</u>
<i>Phragmites australis</i> (Cav.) Trin. ex Steud. ssp. <i>americanus</i> Saltonstall, P.M. Peterson, & Soreng	S3	SNR

4) Additions to the review list:

<u>Scientific Name</u>	<u>New Rank</u>	<u>Old Rank</u>
<i>Potamogeton bicupulatus</i> Fern.	SNR	N/A

5) Taxa which have been removed from the rare vascular plant list and placed on the vascular plant watchlist:

<u>Scientific Name</u>	<u>New Rank</u>	<u>Old Rank</u>
<i>Carex</i> sp. 4 sp. nov.	S3S4	S1
<i>Geranium robertianum</i> L.	S3	S2

6) Taxa which were found on the rare vascular plant list or vascular plant watchlist but are no longer considered a conservation target of any sort:

<u>Scientific Name</u>	<u>New Rank</u>	<u>Old Rank</u>
<i>Cardamine longii</i> Fern.	SNA	S3
<i>Cornus sericea</i> L. ssp. <i>sericea</i>	SE	S1
<i>Hexastylis shuttleworthii</i> (Britten & Baker) Small var. <i>shuttleworthii</i>	SNA	S2?
<i>Hypericum ellipticum</i> Hook.	SNA	SH

7) Taxa whose ranks have changed but are still found on the rare vascular plant list:

<u>Scientific Name</u>	<u>New Rank</u>	<u>Old Rank</u>
<i>Cirsium altissimum</i> (L.) Hill	S1	SH
<i>Dichanthelium annulum</i> (Ashe) LeBlond	S2	S1
<i>Paspalum distichum</i> L.	S2	S1

8) Taxonomic changes made on the rare vascular plant list:

<u>Old Scientific Name</u>	<u>New Scientific Name</u>	<u>New Rank</u>	<u>Old Rank</u>
<i>Amphicarpum purshii</i> Kunth	<i>Amphicarpum amphicarpon</i> (Pursh) Nash	S1	S1
<i>Boltonia</i> sp. 1	<i>Boltonia montana</i> J.F. Townsend & V. Karaman-Castro	G1G2	GNR
<i>Leptochloa fascicularis</i> (Lam.) Gray var. <i>maritima</i> (Bickn.) Gleason	<i>Leptochloa fusca</i> (L.) Kunth ssp. <i>fascicularis</i> (Lam.) N. Snow	G5T5	G5T3T4
<i>Phacelia ranunculacea</i> (Nutt.) Constance	<i>Phacelia covillei</i> S. Watson ex A. Gray	G3	N/A
<i>Platanthera blephariglottis</i> (Willd.) Lindl. var. <i>conspicua</i> (Nash) Luer	<i>Platanthera blephariglottis</i> (Willd.) Lindl.	G4G5	G4G5T3T4

9) Taxa which have been removed from the vascular plant watchlist and placed on the review list:

<u>Scientific Name</u>	<u>New Rank</u>	<u>Old Rank</u>
<i>Asclepias incarnata</i> L. ssp. <i>incarnata</i>	SU	S3

10) Taxa which have been removed from the vascular plant watchlist and are no longer tracked on any list:

<u>Scientific Name</u>	<u>New Rank</u>	<u>Old Rank</u>
<i>Clinopodium glabellum</i> (Michx.) Kuntze	N/A	SH
<i>Dichanthelium mattamuskeetense</i> (Ashe) Mohlenbr.	S4	S3
<i>Solidago sempervirens</i> L. var. <i>mexicana</i> (L.) Fern.	S4	S3

11) Taxonomic changes made on the vascular plant watchlist:

<u>Old Scientific Name</u>	<u>New Scientific Name</u>	<u>New Rank</u>	<u>Old Rank</u>
<i>Boltonia asteroides</i> (L.) L'Her var. <i>asteroides</i>	<i>Boltonia asteroides</i> (L.) L'Her var. <i>glastifolia</i> (Hill) Fern.	S3	S3

12) Taxa which have been removed from the review list:

<u>Scientific Name</u>	<u>New Rank</u>	<u>Old Rank</u>
<i>Calystegia macounii</i> (Greene) Brummitt	SNA	SU
<i>Caulophyllum giganteum</i> (Farw.) Loconte & Blackwell	S4	SNR
<i>Dichanthelium</i> species (syn: <i>chamaelonche</i>)	SNA	SU

<i>Thaspium pinnatifidum</i> (Buckl.) Gray	SNA	SU
<i>Viola villosa</i> Walt.	SNA	SU

APPENDIX 2. RARE SPECIES SIGHTING FORM

An important component of the natural heritage inventory and protection process involves gathering information from state experts, professionals, and avocational naturalists throughout the state. To facilitate this, the Division of Natural Heritage has developed a rare species sighting form. If you would like to participate in our inventory and protection activities, please take a few moments to complete the attached form for any taxon from our lists. This data will be incorporated into the natural heritage data base and used exclusively for the protection of the rare taxon and its habitat. Please send the form to staff botanist John Townsend at: Department of Conservation and Recreation, Division of Natural Heritage, 217 Governor Street, 3rd Floor, Richmond, VA 23219.

Thank you for your support. The Division of Natural Heritage can only realize the protection of the Commonwealth's natural diversity by working through a network of knowledgeable and concerned individuals.
